Each year, millions of birds fly into the windows of our homes. One way we can help birds is to make our windows easier for them to see by using decals. You can make your own window decals in any design you like with a few materials you probably have at home!

**MATERIALS**
- markers
- white school glue
- liquid dish soap
- clear plastic bag or lid
- paint brush

1. Mix 2 tablespoons of white glue with 2-3 drops of liquid dish soap.
2. Place the clear plastic bag or lid over the design you would like for your decals, there are a few on the next page you can use as inspiration.
3. Using your inspiration pictures as a guide, paint in your design with your glue-soap mixture, make sure it isn't too thin.
4. Allow the glue to dry overnight.
5. Colour in your design with your markers.
6. Carefully peel your decal from the plastic sheet.
7. Stick the decal to your window with the uncoloured side against the glass.
8. You're done! Birds can now see your window!
